

The Beauty of

Why Look Older Than You Are?

OUBLE-vision glasses need not make one look older, or cause embarrassment by being conspicuous. Kryptok Lenses

comprise near view and far view lenses in an integral piece of glass. They have an absolutely smooth surface, and are entirely free from the seams, dirt-catching lines, cement and bulky appearance characteristic of old style pasted double-vision lenses.

Kryptok Lenses are good looking. They have the great advan-tage of perfect vision for both distance and reading, coupled with the neat appearance of single-vision glasses. In no way do they suggest advancing years.

Over 200,000 people are now wearing Kryptok Lenses

We grind Kryptoks and all other lenses in our own factory on the premises.

This Skin Peeler All the Rage in Society

(From Society World.)

There is a growing tendency among women of culture and fashion to pay more attention to hygienic means of preserving their chatms. The advent of mercolized war doubtless has been largely responsible for this. This remarkable substance produces complexions so paired in appearance. markable substance produces complexions so natural in appearance, so maximatically beautiful, artificial complexions are no longer desired. Instead of "doctoring" an offensive skin, the skin is pecled off. The wax pacis the skin so gradually, in such fine particles, no discomfort is experienced. The fresher younger skin beneath, wholly in evidence within a week or two, is illy white satiny soft and smooth. It's not activated over complexion, but a brand dence within a week or two, is his white satiny soft and smooth. It's not a patched-over complexion, but a brand new one. That's why mercelized wax has become such a rare among society folk. The wax is put on nights like cold cream and washed off mornings. All druggists have 'it' one Canada.

Another hystenic treatment now much in favor in one to remove wrinkles, made by dissolving I or powdered saxolite in 1-2 pint witch hazel. Used as a wash lotion it "acts like magic"—Advertisement.
